DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Dynarski et al. (6,272,129).

3. Dynarski teaches a method and system (abstract) of setting up devices for communication on a network (col. 1, line 1 – col. 3, line 35) for transferring media (col. 4, lines 35-45; exchange of information or data as broadest reasonable interpretation. More specifically, the system locates the first device (Fig. 1, #14) for communication with the second device (Fig. 1, #10) via detecting the coupling (col. 4, line 45 – col. 5, line 3) and assigning a static or dynamic address (IP address) and serial number identifier (ESN or Electronic Serial Number) and using a headend (home agent #22) to register (table) the association (col. 5, lines 3 - 62). Thus, in a request for communication from the second device, the system may communicate the information to the communication server and broadcast through the network such that the communication is initiated (col. 6, line 55 – col. 8, line 50).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They regard further teachings on home networks, broadband communications, headends, and the assignment of addresses and identifiers.
